EnerTEF Service Catalogue

The Long-Awaited EnerTEF Service Catalogue is Here!

After months of dedicated collaboration across the expansive EnerTEF ecosystem, coordinated by DSS Lab and EPU-NTUA, the EnerTEF consortium is proud to announce the release of the first draft of its **Catalogue of Services**. This milestone brings together the expertise and innovation of 5 dynamic nodes and 3 cutting-edge satellites, marking a significant advancement in AI-driven solutions for the energy sector.

The newly unveiled catalogue features:

- **30 cutting-edge services** from EnerTEF Nodes
- **10 innovative services** from EnerTEF Satellites

This comprehensive resource opens a wide range of testing and experimentation opportunities, enabling stakeholders to leverage AI and advanced technologies to transform the energy landscape.

Bridging the Gap Between End-Users and SMEs
The EnerTEF Service Catalogue is designed to connect end-users with innovative SMEs by:

- Clearly defining service needs within the energy sector
- Providing essential resources such as datasets and high-performance computing (HPC) power
- Empowering startups and SMEs to develop tailor-made AI solutions that address real-world challenges and drive impactful results

The final version of the catalogue is expected soon, promising even greater value for all stakeholders involved.

Calling All SMEs and Startups!
EnerTEF invites SMEs and startups to explore the catalogue and prepare for upcoming opportunities. Exciting developments and new services are on the horizon! Are you ready to be part of the energy sector's AI revolution?

Stay tuned for more updates!
